

Feature at a Glance

Invoice cycle time benchmark widget (BNA-12)

Content Owner: Chris Chase

Target GA: Q1 2023

Introducing: **Invoice cycle time benchmark widget**

Feature Description

- The Invoice Cycle time Benchmarking widget displays the average invoice cycle time on the supplier home page.
- The invoice cycle time benchmarking widget allows suppliers to compare their customers' average invoice cycle time performance against the aggregate performance of the network.
- Suppliers may compare performance by supplier region, buyer industry, and buyer performance quartile.
- Suppliers may choose last quarter, last month, last 12 months

Key Benefits

- Allows suppliers to use benchmarking as tool to improve performance.
- Allows suppliers to identify customer behaviors for discussion in contractual negotiations and in quarterly business reviews.
- Provides access to benchmarking data spanning many industries and regions.
- Eliminates costly data collection activities required to share data with a benchmarking service provider

Audience:

Suppliers

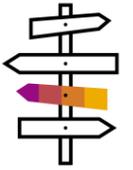

Enablement Model:

Low Touch

Applicable Solutions:

SAP Business Network

User Story

User Story: As a financing manager in my company, I need understand how long customers take to approve our invoices.

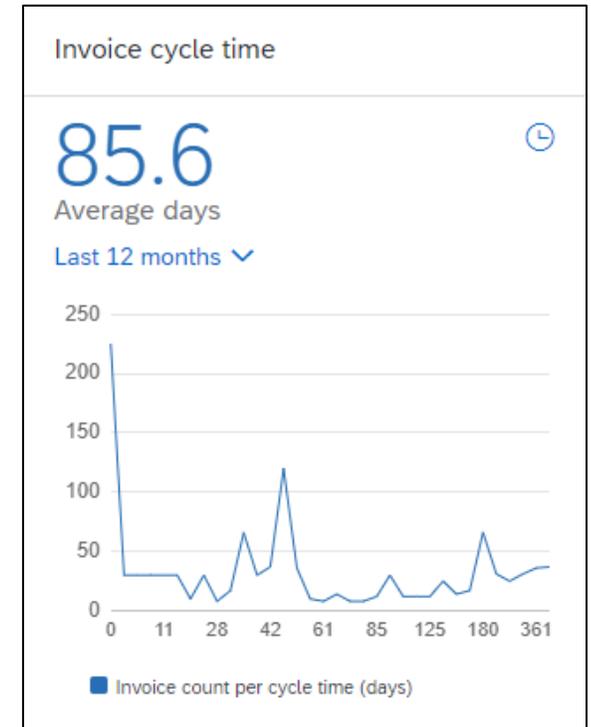

If our customers do not approve our invoices a timely manner, it may impact our relationship and our customers ability to pay on time. Our customers with low invoice cycle times have the following characteristics:

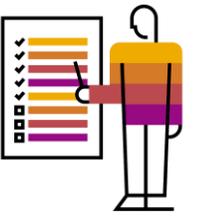

- standard processes and formats for invoice submission
- methods in place to reduce paper invoice submissions
- incentives to support the use purchase orders
- a high emphasis on internal performance including monitoring and measurement

We place a strong emphasis on supporting our customers process improvement objectives.

KPI Definition: The number of business days required to process an invoice from when the invoice is received by the Accounts Payable Department until it is approved and scheduled for payment.

A approved invoice is a scheduled payment in Ariba Network.

Prerequisites, Restrictions, Cautions

Prerequisites

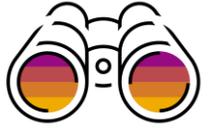

- None

Restrictions

- You must have a bronze level or above subscription.
- You must have the Payment Activities, Outbox Access, or Invoice Generation permission to see the widget.
- This widget does not include scheduled payment data from test accounts.
- The KPI calculation excludes failed, cancelled and on hold scheduled payments.
- Invoice Cycle Time = Date the scheduled payment was received - Invoice date of scheduled payment (ignoring time stamp)

Cautions

- Not all buyers load scheduled payment data to Ariba Network.
- A scheduled payment is the buyer's representation of the supplier invoice in the buyer's accounts payable system.
- The SAP Business Network KPI framework includes intelligence to identify and exclude data outliers that may be bad data, test data, or otherwise interfere with the KPI calculation. Therefore, KPI calculations may not fully reconcile with the scheduled payments with status Paid on Ariba Network .

Feature Details

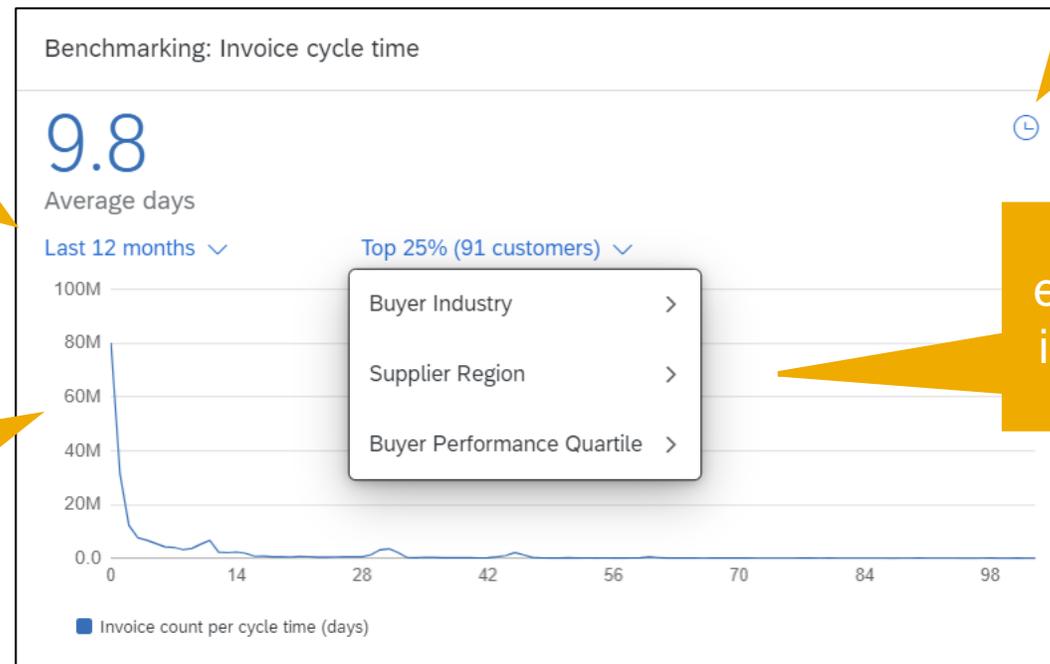

The Ariba Network calculates invoice cycle time using scheduled payments data

Date Range chooser: Last 12 months, Last quarter, Last month

The line chart shows the count of scheduled payments per cycle time in days.

Time stamp of last data refresh

The chooser allows you to evaluate the benchmark by buyer industry, supplier region or buyer performance quartile.
