

# Feature at a Glance

## Migration of Legacy Audit Logs to SAP Ariba's Audit Service (PLMSG-1557)

Target GA: May 2023

# Migration of legacy audit logs to SAP Ariba's audit service

## Description

- This feature introduces a phased migration of audit logging in SAP Ariba solutions to SAP Ariba's audit service.
- All new audit data logged after the notified transition date will be available only in the audit service logs, accessible from the Intelligent Configuration Manager (ICM).
- Initially, legacy audit data logged in the one year preceding May 1, 2022 (the date on which the audit service became available) will be migrated to the audit service.
- Until this migration is completed, legacy audit data will be available in both the internal logs of SAP Ariba applications and the audit service logs.

## Customer benefit

- Customers previously had to search for older audit logs in the core stack audit logs (via the service manager of the Buyer) and only new audits were available in the ICM, requiring customers to search in two different places for their audit logs.
- Customers can now search for their complete audits in ICM after migration is completed. With this feature, audit logging will be done in SAP Ariba's audit service, and legacy audit data in SAP Ariba solutions will be migrated to the audit service. All new audit data logged will be available only in the audit service logs, accessible from ICM.

## User

- Buyer

## Enablement model

- Automatically on

## Applicable solutions:

- SAP Ariba Buying and Invoicing
- SAP Ariba Buying
- SAP Ariba Invoice Management
- SAP Ariba Sourcing
- SAP Ariba Contracts
- SAP Ariba Supplier Lifecycle and Performance
- SAP Ariba Strategic Sourcing Suite
