

RoboS

User Reference Guide

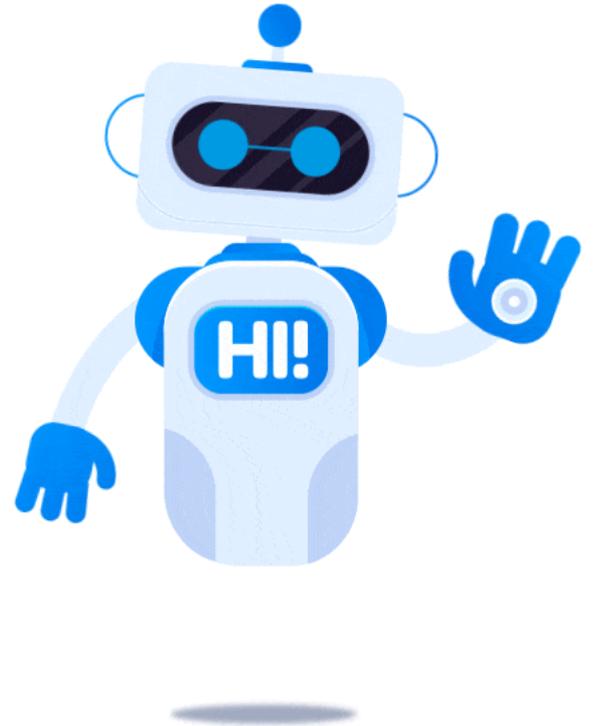

RoboS | Response on Behalf of Shared Services

RoboS is an interactive chatbot platform developed for the vendors/suppliers to enable them self services for different functions.

The chatbot is available on both web and mobile and will help suppliers get details of their invoices and other basic business function.

RoboS is developed using PWA(Progressive Web Application) technology to ensure the incremental new features deployment on the platform doesn't need supplier to upgrade their mobile applications as new functions are added on the platform.

RoboS follow a single design principle on both desktop / mobile to ensure seamless user experience over the devices

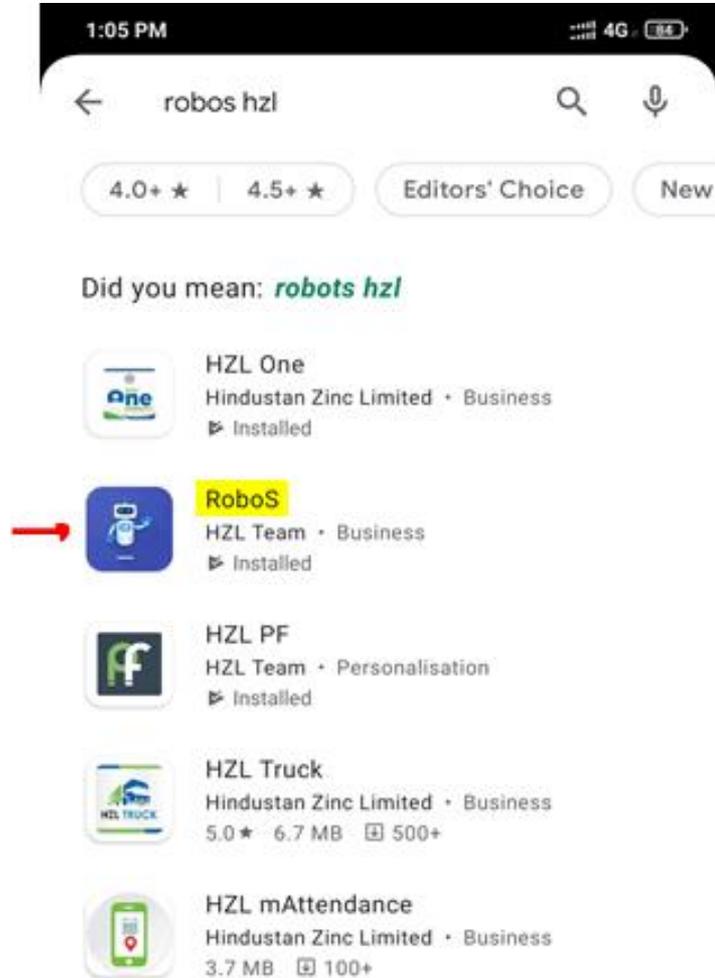

RoboS | Installing the application

RoboS is available in both the option Web application for desktop users as well as Mobile App

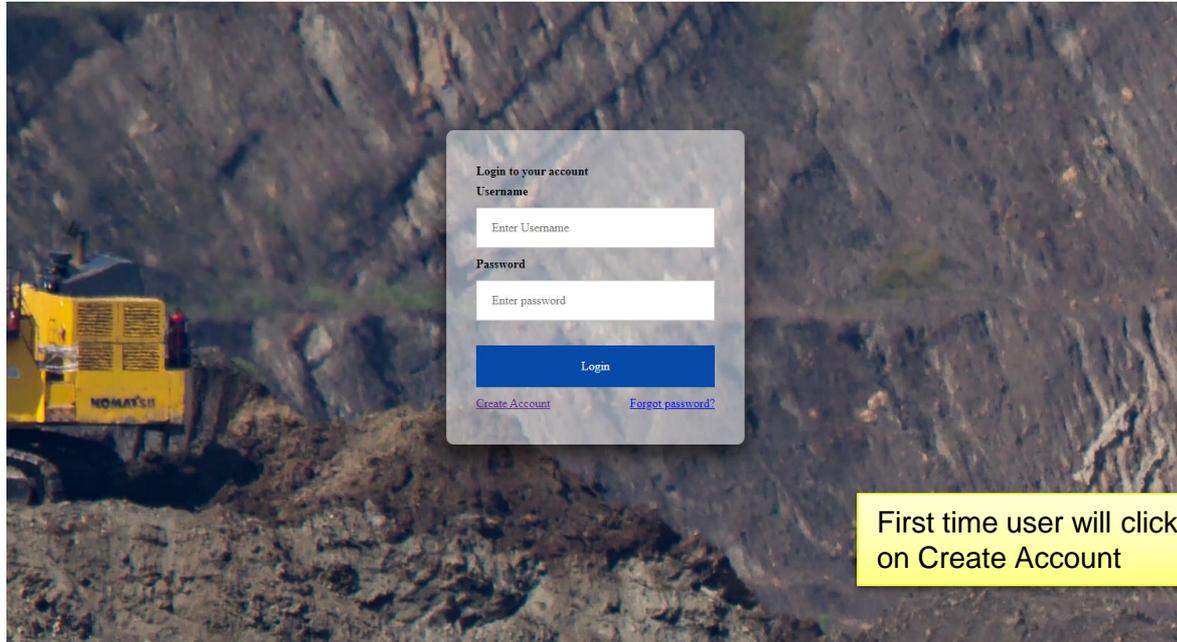

Web link <https://sscapp.hzlmets.com/RoboS/Web/>

Play store/ App store – Search with “RoboS HZL”

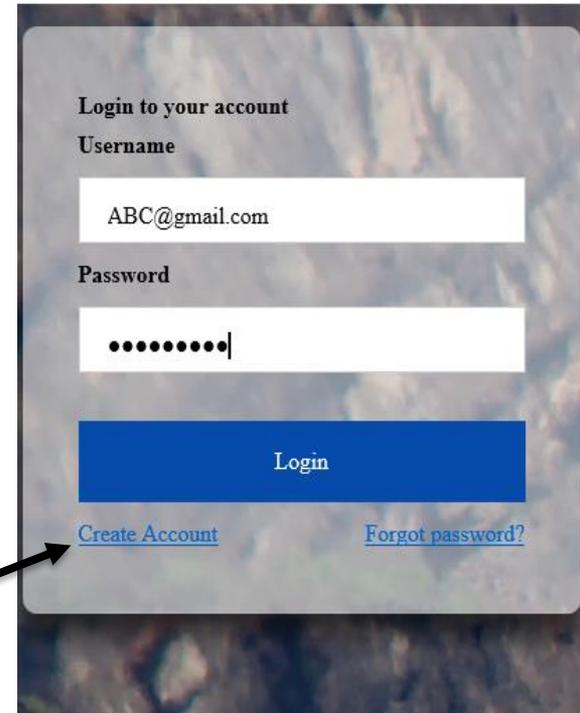

RoboS | How to access

RoboS is available on the web link <https://sscapp.hzlmets.com/RoboS/Web>, the link can be accessed over any Morden browser(Internet explorer/Chrome/Safari/Firefox/Edge), but **recommended browser is Chrome** to avoid any further settings.

First time user will click on Create Account

RoboS | How to access

Additional settings are required in case you are using Internet explorer to access RoboS.

Following are steps for internet explorer 11 and older browsers.

Select the **Gear** in the upper-right corner of the screen or the **“Tools”** menu if you have the menu bar enabled, then select **“Internet Options”**.

Select the **“Security”** tab.

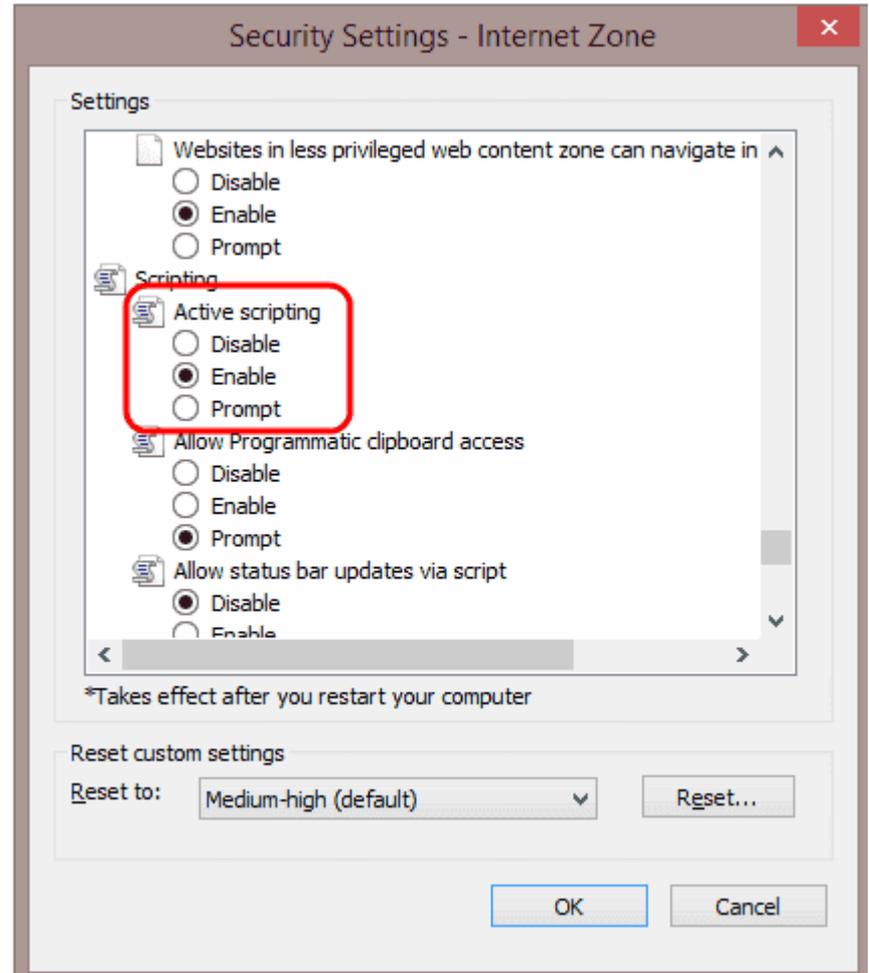

Select the zone you wish to modify. In most cases, it will be **“Internet”**.

Select the **“Custom level...”** button.

Scroll down to the **“Scripting”** area and select the radio button to **“Enable”**. You may also opt for IE11 to **“Prompt”** you to allow scripts to run.

Select **“OK”**, then **“OK”** again

After this change please restart your system.
