- Warning - Limitation

Attachments

- What it looks like
- Setup within the catalog

FOREWORD - 1

Goal:

This guide will endeavour to outline the basic requirements for an *Excel* field to function. Some fields have more options, but as they are neither mandatory nor essential to the functioning of the field itself, they have been left out.

Understanding the basic syntax:

1. Each Excel field contains subset of headers
2. Each subset of headers are marked by different colors based on whether it is mandatory to the field or not (i.e. if you use an optional field, you have to fill out its mandatory sub-fields as a minimum requirement in order for the fields to function properly)

Main header

PriceConfiguration-1					
StartDate	EndDate	Amount	PriceCurrency	PriceFactor	Lowerbound

Sub-fields

Subset headers with **blue** as mandatory (i.e. minimum required fields to be filled so that it functions) and **yellow** as optional

FOREWORD - 2

Prerequisites:

As with BMEcat, CMS needs to be enabled along with all the required technical setups however this format permits a catalog to have the BMEcat features as well as parametric data and customer custom fields (not available in the BMEcat format)

Notes:

Maximum size of Excel catalog: 15 MB

When uploading incremental parts to a catalog, ensure that you previous catalog part is in status green/validated on the SAP Business Network (see below example)

Created By	Date Created	Status	Date Status Received
Estlega	11 Oct 2021	Validated by Customer	11 Oct 2021
