

## Webcast Q&A

Guided Buying	Question	Answer
	Hello, on the feature GB-23882, the RFQ are the ones generated on Guided Buying or Sourcing?	From Sourcing.
Supplier Management	Question	Answer
SM-44557: Provide Tax Information in Email Notification Sent for Supplier Registration	The feature on the Tax Id on the supplier registration, what is the source of this tax id? Is the one on the registration questionnaire or the one coded by the supplier on Business Network?	The source is the tax id, which the buyer has in the system for the supplier, e.g. when supplier data have been uploaded from the backend system to SLP. While AN IDs or buyers' internal IDs for suppliers do not mean anything for the supplier, they may / hopefully will be able to identify their own Tax Id. This is helpful if a supplier has multiple SAP Business Network accounts.
	How does the tax id change help suppliers identify the correct account?	They can see / identify if it is the correct tax id.
Supplier 360	Question	Answer
	Is there a parameter to be enabled for the new supplier 360 view? We are unable to view the same for our customers.	Yes, it needs to be enabled / activated.
	Do we need SLP to have the supplier 360 enabled?	Yes, you will need SLP.
	The new UI for supplier profiles is mandatory?	The New Supplier Profile Summary is not currently mandatory however our focus for innovations is to improve upon this and we do not intend to continue enhancing the earlier Supplier 360 view.

**Supplier  
Assessment /  
Questionnaires**

	<b>Question</b>	<b>Answer</b>
	Why is the SAQ not automatically updated instead of showing an alert?	Due to a difference in the questions being asked, some answers may not be compatible. As a result, there may be a need to keep the historical version as the current version for some time until a new round of answers can be obtained.
	When can we see a full list of all assessments that are on or are planned to be on the network?	There is currently one assessment / questionnaire that is hosted on the network. Any additional items will be included in the release readiness content once released

**Supplier Risk**

	<b>Question</b>	<b>Answer</b>
	Is it planned to include spend data into Supplier Risk to assess the risk impact on my organization?	Interesting aspect. Not yet, but it is an interesting element. Today you will have to do it with workarounds.
	Is the Country / Region Risk score available as standard? Or does it need to be turned on?	This must be turned on to be used. For further information, please see the what's new content for the SAP Ariba 2408 release.
ARI-20913: Supplier Risk Segmentation and Risk Analysis	What is the source for commodity risk score and which classification ist used (NACE or UNSPC)?	Commodity Risk score can be uploaded via import task. This uses the same commodity codes used across the rest of your strategic sourcing suite.
