- Uploading and Publishing New Catalogs
- Replacing Existing Catalogs
- Appendix
- Questions

The Catalog Upload **Process**

The Catalog Upload Process

The Catalog Upload Process

- When you upload a Catalog for your Customer, you are loading the file to Ariba Network (AN)—**not** directly to your Customer's Catalog.
- Once the file is loaded to the Network, your Customer is notified that a Catalog has been loaded.
- Depending on the configuration of the Customer's environment:
- The Catalog will then be validated, audited and sent for Approval.
 - If **Approved**, it will be Activated and available for Users.
 - If **Rejected**, it will be returned to the Supplier for corrections, and the process starts over again.

The Catalog Template

The Catalog Template

- Both Static and PunchOut Catalogs use Catalog Templates.
- Static Catalogs are generally created offline and uploaded to the Ariba Network.
- PunchOut Catalogs **can** be created offline, but there is also a Wizard on the Network to create PunchOut Catalog files—these are special static files called “Index Files”.
- Creating PunchOut Index files is covered in another document, CAT 107 - *Creating PunchOut Index Files*.

The CIF Catalog Template

CIF Catalogs are the most common type of static Catalogs. For ease of CIF Catalog creation, we provide Suppliers with an Excel template. The Supplier then creates and uploads the Catalog file to Ariba Network. Below is a sample of an Excel CIF Template:

	A	B	C
1	CIF_I_V3.0		
2	CHARSET:	UTF-8	
3	LOADMODE:	F	
4	CODEFORMAT:	UNSPSC	
5	CURRENCY:	USD	
6	SUPPLIERID_DOMAIN:	NetworkID	
7	ITEMCOUNT:	5	
8	TIMESTAMP:	03/14/2014	
9	UNUOM:	TRUE	
10	COMMENTS:	Customer Name and comments	

Header section

Data section

The CIF Catalog Template

The Template is color coded and has Tool Tips that provide information about how to treat each field.

Each Template includes specific instructions, including custom fields or other requirements set by your Customer.

Unit of Measure		Lead Time	Manufacturer URL		Market Price	Supplier Part Auxiliary ID	Language	Currency	Short Name
EA	1	Interdata	http://www.idg.com/2772967				en_US	USD	4-Line Phone
EA	1	IDG Books Worldwide	http://www.idg.com/2772967				en_US	USD	Excel 97 for Dummies
DZN	1	Bic	http://www.idg.com/2772967				en_US	USD	Blue Ballpoint Pens
GRO	1	Mead	http://www.idg.com/2772981				en_US	USD	Manilla Folders
EA	1	Swingline	http://www.idg.com/2772981				en_US	USD	Standard Stapler

Optional
Number of business days between order receiving and delivery to customer.
Type: Integer

FIELD COLOR CODES	
	Required
	Optional
	Optional, but preferred
	Do not use

The CIF Template and instructions are provided to Suppliers as part of this education and can also be found on the Customer's Supplier Portal page on the AN.

Creating a CIF Catalog

Creating a CIF Catalog

General Rules

- All fields marked “Required” must be populated.
- Supplier Part Numbers must be unique per item.
- Commodity Codes must be assigned to each item.

Best Practices

- Data should be submitted in “Sentence case”—using both upper and lower case letters—not in ALL CAPS or all lower case text.
- Abbreviations should be kept to a minimum—if you have the space, spell it out.
- Be descriptive in the Description field—all the words are indexed for ease of finding the items.
- Use Short Names not just Descriptions—it makes it easier for Users, and you get an additional 80 characters to describe your item.
- Always include images

Ariba Network – File Size Limits

- CIF Format : When using the catalog wizard, the catalog file can't exceed 95 MB or 400,000 lines.
- Excel Format : The maximum size of zipped Excel file that you can upload is 1 MB (uncompressed). If your Excel files exceed these size, you can convert them to CIF manually and upload the CIF files. Ariba Network uploads the file, unzips it if necessary, converts it to CIF format, and starts validation. Conversion from Excel to CIF can take several minutes depending on the catalog size. As Excel files convert, their status is Validating.
- cXML Format: If you use the cXML CatalogUploadRequest transaction, the zipped catalog file cannot exceed 10 MB, and the unzipped CIF file cannot exceed 95 MB (approximately 400,000 line items). To have this default size limit increased to 200 MB, contact SAP Ariba Customer Support.

Creating a CIF Catalog

The Header Section

	A	B
1	<u>CIF_I_V3.0</u>	
2	<u>CHARSET:</u>	UTF-8
3	<u>LOADMODE:</u>	F
4	<u>CODEFORMAT:</u>	UNSPSC_V13.5
5	<u>CURRENCY:</u>	USD
6	<u>SUPPLIERID_DOMAIN:</u>	NetworkID
7	<u>ITEMCOUNT:</u>	5
8	<u>TIMESTAMP:</u>	5/15/2005
9	<u>UNUOM:</u>	TRUE
10	<u>COMMENTS:</u>	Any comments can go here.

Note: The only fields that Suppliers should modify in the Template are indicated in red: **CURRENCY**, **ITEMCOUNT**, **TIMESTAMP** and **COMMENTS**. All the other fields are predefined in the Template for the Customer and should not be modified, unless instructed by a Catalog Expert.

- **CIF_I_V3.0**—Specifies the Catalog format (CIF 3.0). Do not change this value.
- **CHARSET**—UTF-8 Specifies the data coding type. Do not change this value, unless instructed by your Catalog Expert.
- **LOADMODE**—F (Full) or I (Incremental)
- **CODEFORMAT**—Specifies the commodity coding (UNSPSC: United Nations Standard Products and Services Code) in the field “SPSC Code”
- **CURRENCY**—Specifies the currency used for the prices. The value “USD” (United States Dollar) is here by default and can be changed to a difference currency.
- **SUPPLIERID_DOMAIN**—Specifies the Domain used. The preferred value is the Supplier’s Ariba Network ID Number—“NetworkID”. Other values include “DUNS”, “internalsupplierid” or other custom values.
- **ITEMCOUNT**—Specifies the number of items of the Catalog. Enter the total number of all item between the DATA and ENDOFDATA markers.
- **TIMESTAMP**—Enter the date you created your Catalog.
- **UNUOM**—If set to “TRUE”, the Unit Of Measure is set to UNUOM (United Nations Unit of Measure); if set to “FALSE”, the value is set to ANSI. (Ariba recommends UNUOM).
- **COMMENTS**—This field is optional, but can be used for comments related to your Catalog. It is a good place to enter the Supplier Name, the Customer Name and Catalog Name.

Creating a CIF Catalog

The Data Section

Supplier ID	Supplier Part ID	Manufacturer Part ID
AN999999999999	12345	CFG 11562
AN999999999999	87690	87690-12
AN999999999999	479-56	A100-BLK

- **Supplier ID - Required**

Description: If the Header is set to “NetworkID”, then enter the Supplier’s Ariba Network ID, otherwise the appropriate value for the Domain used—DUNS, internalsystem, etc. Ask your Catalog Expert if you have questions.

Type of data: String

Maximum length: 255

Example: AN999999999999

Note: If you publish the Catalog in your test account, add a suffix –T to your ANID or DUNS number like this: AN999999999999-T.

- **Supplier Part ID - Required**

Description: Part Number used by the Supplier. The Part Number must be unique for each item in the Catalog.

NOTE: If you provide more than one catalog for the same customer, make sure the items across these catalogs do not share the same Part ID + Part Auxiliary ID as this duplicates will cause erratic behavior in the application.

Type of data: String

Maximum length: 255

Example: 2772882

- **Manufacturer Part ID - Optional**

Description: A Part Number that a Manufacturer uses.

Type of data: String

Maximum length: 255

Example: TTSIBM412CID

Creating a CIF Catalog

Item Description	SPSC Code	Unit Price
Pens, Bic, Ballpoint, Blue, 1 dozen	43191504	3.48
Stapler, Swingline, Black	55010125	18.72
Post-It, Yellow, 1"x2", pad of 100	15874236	6.49
Folders, Letter, Manilla, 100	89745125	12.98

■ Item Description - Required

Description: Description of the product or service. Make your descriptions as clear and complete as possible (Item type, brand, model, color, etc.).

Note: To use a special character as a literal value, you need to “escape” it by putting a backslash (\) in front of it. For example, \" lets a double quote be seen as a quote instead of a delimiter for an entry. To escape a quote (") within a quoted field, use two quotes (").

Type of data: String

Maximum length: 2000

Example: Printer, Laser, A4, Epson Stylus Color 740

■ SPSC Code – Required

Description: Classification of the product or service. Use a UNSPSC code if the Header specifies “UNSPSC” as the CODEFORMAT.

Type of data: String

Maximum length: 40

Example: 45678900 (level 3) and 45678923 (level 4)

Note: Ariba supports UNSPSC Version 13.5. A code list is available in your Customer’s Supplier Information Portal.

■ Unit Price - Required

Description: Customer-specific price

Type of data: Decimal

Example: 4.32 or 1234.78

Note: To separate the integer from the decimal, you must use a ‘dot’ and not a comma. Also, do not use a comma to indicate ‘thousands’. Do not include any currency symbols such as \$, £ or ¥.

Creating a CIF Catalog

Unit of Measure	Lead Time	Manufacturer Name
EA	1	Intelidata
EA	1	IDG Book
DZN	3	Bic
EA	1	Swingline

- **Unit of Measure - Required**

Description: Unit of measure related to the Unit Price. Use a United Nations UOM if the UNUOM in the Header is set to "True".

Type of data: String

Maximum length: 32

Example: BX

Note: A file containing the Units of Measure is available in your Customer's Supplier Information Portal.

- **Lead Time - Optional**

Description: Number of working days for the product to be shipped from the date you receive the Purchase Order

Type of data: Integer

Maximum length: 40

Example: 1

- **Manufacturer Name - Optional**

Description: Name of the manufacturer

Type of data: String

Maximum length: 255

Example: Epson

Creating a CIF Catalog

Supplier URL	Manufacturer URL	Market Price
http://www.supplier.com	http://www.manu.com	12.95
http://www.supplier.com		2296.56
http://www.supplier.com		4.86
http://www.supplier.com		12.86

- **Supplier URL – DO NOT USE**

Description: A URL that links to a Supplier static page about the item (could be a MSDS, construction info, packaging info, etc.)

Type of data: String

Maximum length: 255

Example: http://www.supply.com/Catalog/product18.htm

- **Manufacturer URL Do NOT USE**

Description: A URL that links to a Manufacturer's static page about the item (could be a MSDS, construction info, packaging info, etc.)

Type of data: String

Maximum length: 255

Example: http://www.manu.com/Catalog/product18.htm

- **Market Price – DO NOT USE**

Description: List or retail price.

Note: Does not show on the Ariba UI—this is an informational-only field for Suppliers.

Type of data: Decimal

Example: 4.32 or 1234.78

Note: To separate the integer from the decimal, you must use a 'dot' and not a comma. Also, do not use a comma to indicate 'thousands'. Do not include any currency symbols such as \$, £ or ¥.

Creating a CIF Catalog

Supplier Part Auxiliary ID	Language	Currency
1234-75	en_US	USD
	en_US	USD
	en_US	USD
	en_US	USD

- **Supplier Part Auxiliary ID - Optional**

Description: Uniquely identifies a single item. For example, items in multiple languages or available in multiple units of measure.

NOTE: If you provide more than one catalog for the same customer, make sure the items across these catalogs do not share the same Part ID + Part Auxiliary ID as this duplicates will cause erratic behavior in the application.

Type of data: String

Maximum length: 255

Example: 1234 French

Note: If any items have the same reference (Supplier Part ID column), this column allows you to differentiate them.

- **Language – Optional** (If blank, defaults to 'en_US')

Description: Specifies the language used to describe the item.

Type of data: String

Maximum length: 255

Example: en_US

Note: A listing of language codes is in your Customer's Supplier Information Portal.

- **Currency – Optional** (Set in Header)

Description: Specifies the currency used for the prices

Type of data: String

Maximum length: 32

Example: USD, CAD (Canadian Dollar)

Note: A listing of currency codes is in your Customer's Supplier Information Portal.

Creating a CIF Catalog

Short Name
Soft Drink, Soda, Dr Pepper
Dairy, Milk, 1% milkfat
Coffee, Dark Roast, Starbucks
Soft Drink, Juice, Minute Maid

- **Short Name - Optional**

Description: Short description of the item. The Short Name is displayed first in the UI, and is in a larger type face and blue color. You can use the Short Name to describe a category or Item type, then give the specifics in the Item Description.

Type of data: String

Example: Nylon Glove, Blue

Maximum length: 80 characters

Note: If the “Short Name” field is left blank, the first 80 characters of the Item Description column will automatically fill the “Short Name” field.

Creating a CIF Catalog

587.jpg	http://www.1.com/587.Jpg
http://www.1.36.jpg	http://www.1.36.jpg

■ Image - Optional

Description: URL of the item's image (preferred), or filename of the image (sent in a zip file)

Supported image formats: JPG, JPEG, GIF, PNG, BMP—(JPG preferred)

Type of data: String

Maximum length: 255

Recommended Size: 250 x 250 pixels

■ Detail: Thumbnail - Optional

Description: URL of an Icon-size image of the item, or filename of the image (sent in the zip file)—can be different from the product's full-size Image.

Supported image formats: JPG, JPEG, GIF, PNG, BMP—(JPG preferred)

Type of data: String

Maximum length: 255

Recommended Size: 85 x 85 pixels

Note: If the "Thumbnail" field is left blank, the file in the "Image" field will be resized and populate the Thumbnail.

Creating a CIF Catalog

Special Notes for Images

- In the Catalog file, you can refer to a Remote Image—using a URL—or you can refer to a Local Image, and send that image to Ariba to store.
- Using Remote Images is preferred.
 - Be sure the URL in the Template is *complete* (including http://) *Example:* `http://server/directory/imagefilename.jpg`.
 - Point to the image itself—not a program that serves up images.
- If you use Local Images,
 - Be sure the filename in the Template is *exact*—including upper and lower case *Example:* `FileName.jpg` -or- `lowercasename.jpg`.
 - Load images in a zip file format with the Customer Name and Supplier Name on the AN.

The Catalog **User Interface**

The Catalog Interface Item View

This is how a static Catalog item is displayed in the Catalog interface. Clicking on the Short Name takes you to the Details screen for this item.

The screenshot displays a catalog item card for 'Nylon Glove, Blue'. On the left, there is a small square icon and a larger image of a blue glove. To the right of the images, the item name 'Nylon Glove, Blue' is shown in blue text, with a red line pointing to it from the label 'Short Name (80 characters)'. Below the name, the supplier information is listed: 'Supplier: Supplier Name', 'Supplier Part #: 34-500', and 'Available in: 3 Day(s)'. To the right of this information, the price '\$3.98 USD / pair' is displayed in green. Below the price, there is a quantity input field with '1' and an 'Add to Cart' button. Below the quantity field, there is a link 'Add to Favorites'. At the bottom of the card, a detailed description is provided: '34-500 Nylon Knit Glove with Nitrile Coated MicroSurface Grip. Nitrile "MicroSurface" coating provides a superior grip in dry, wet and oily conditions. Seamless knit nylon shell offers increased comfort, finger dexterity and breathability Knit Wrist helps prevent dirt and debris from entering the glove Excellent resistance to liquid permeation Strong protection from punctures and abrasions'. A red line points from the label 'Description (2,000 characters)' to the start of this description text.

Uploading and Publishing New Catalogs

- Switch to your Test Account
 - Your Catalog should be loaded and tested in your Test Account. (*Note: If you are instructed to load a Catalog to a Production account, just skip this step*)
 - Find your name and click for the pull down menu, then click “Switch To Test ID”.
 - If you don’t see a “Switch to Test ID” link, your Test account has not yet been set up. Contact your Ariba Network Administrator.

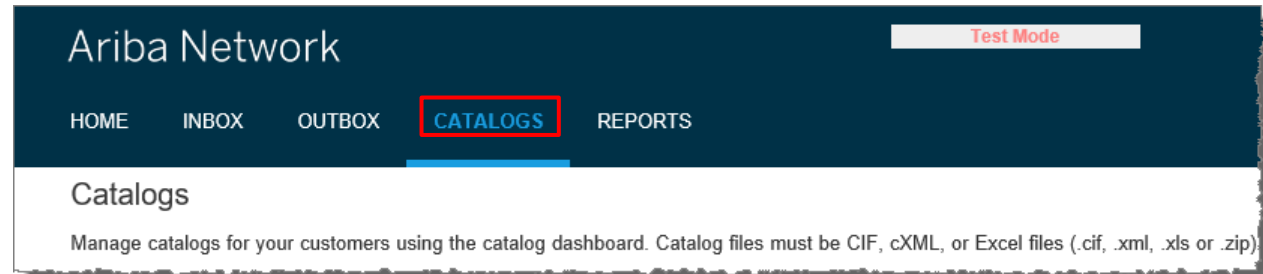

- You will get a warning. **“You are about to switch to Test Mode.”** Click “OK”.

Uploading and Publishing New Catalogs

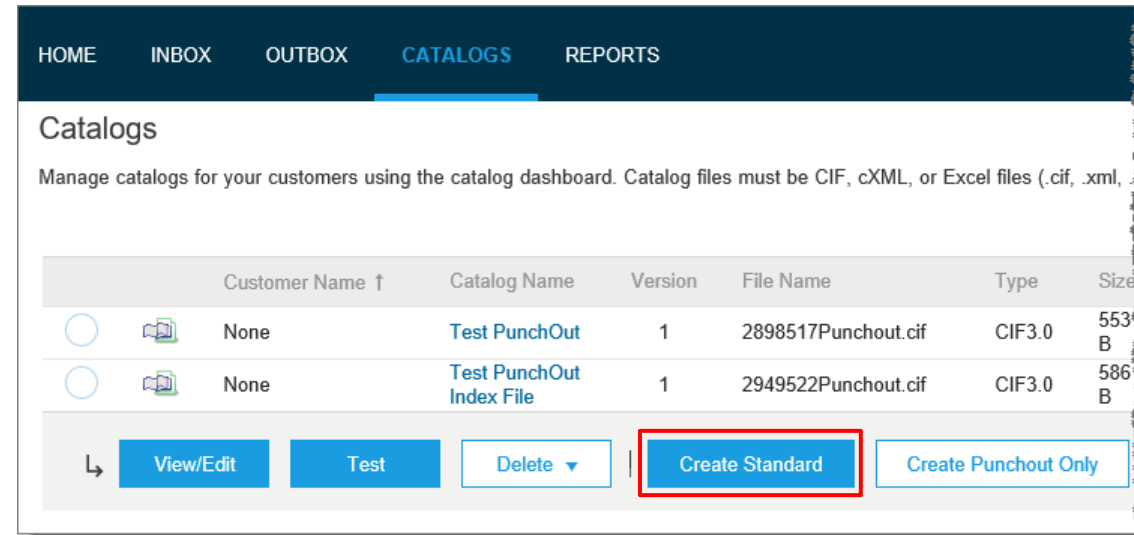

- When uploading a Catalog on Ariba Network, there are four steps you will follow:
 1. **Uploading**—Transfers the Catalog file from your local drive to Ariba Network. During the upload process, you enter the Catalog name (this becomes the “Subscription Name” in the Buyer’s local Catalog) descriptive text, and classify it so that buying organizations that are looking for specific products and services can find your Catalog.
 2. **Setting Visibility**—Allows you to specify whether the Catalog version is “Public” or “Private” and determines which of your Customers can access it.
 3. **Validating**—The Network checks the Catalog for errors, checks for zero price values and does a high-level validation of UNSPSC codes and Units of Measure.
(Note: Customer-specific validation rules for UNSPSC and UOM codes, and zero price values can be more detailed and much more strict than the high-level Network validations. Therefore your Catalog may **pass** the Network validations but **fail** the Customer-specific validations for these same items.)
 4. **Publishing**—Freezes the current version and notifies your Customer of the Catalog’s availability.

Uploading and Publishing New Catalogs

- Navigate to the Catalogs Tab.

- On the Catalogs screen, click the “Create Standard” button.

Uploading and Publishing New Catalogs

- You are now on the **Create a New Catalog** Screen.
- To create the Catalog, there is a 3-step Wizard:
 - ① **Details**—General information about the Catalog
 - ② **Subscriptions**—Who you are publishing the Catalog to
 - ③ **Content**—Uploading the actual Catalog file

- Click “Next”.

The screenshot shows the 'Create a New Catalog' wizard interface. On the left, a sidebar contains three steps: '1 Details' (highlighted with a red box), '2 Subscriptions', and '3 Content'. The main area is titled 'Enter a catalog name and descriptive text. Customers can search using this information. Add commodity codes to your catalog. * indicates required field'. It includes a 'Catalog Name: *' text box, 'Created By: Catalog Manager' and 'Date Created: Tuesday 30 Aug 2016 10:59 PM GMT-07:00' labels, and a 'Description:' text box with a character count of 'Characters left: 1000'. Below this, a note states 'The maximum number of characters allowed is 1000, including spaces.' A 'Commodities: ⓘ' section shows a table with one header 'Description' and one row 'No items'. At the bottom of the table are 'Delete' and 'Add' buttons. The wizard has 'Next' and 'Exit' buttons at the top right and bottom right.

Uploading and Publishing New Catalogs

① Details

- **Catalog Name:** This becomes the “Subscription Name” for this Catalog that **will not change**. The format for this Name is set by your Customer. Ask for the format to use (no special characters are allowed, you can use a dash (-) or underscore(_)): **<Put the specific format required by the Customer here>**
- **Description:** *(Optional)* Brief description of the content of your Catalog
- **Commodities:** *(Optional)* The UNSPSC code(s) that corresponds to the items family/ group of your Catalog. Use the “Add” button to find the code.
- When you complete this screen, click “Next”.

Uploading and Publishing New Catalogs

② Subscriptions

- You determine which Customers subscribe to your Catalog—specific Customer(s) or to all Customers on the Network.
- Set the Visibility to “Private”. You can select a single customer.
- To select your Customer, check the box next to their name in the “Customers” list.
- If the Supplier does not appear, it means that they have not established a relationship with your company yet. This is required prior to uploading a Catalog to them.
- When you complete this screen, click “Next”.

■ Network Catalog Validation

- After the Network completes validation, it changes the Catalog status from “Validating” to one of the following statuses:
 - **Validated, Published or Pending Buyer Validation**—your Catalog is error-free.
 - **Errors Found by Ariba Network**—the Network detected Catalog content that violates validation rules.
 - **Bad Format**—your Catalog failed the file validation check. Audit the file for problems in format.
- A Catalog with an error status means you need to review the error results and correct them before going on.

Catalogs

Manage catalogs for your customers using the catalog dashboard. Catalog files must be CIF, cXML, or Excel files (.cif, .xml, .xls or .zip). Some customers might have defined specific catalog validation rules, [More](#)

Uploading and Publishing New Catalogs

- Viewing Validation Errors
 - The Network displays Description, Field and Line Number for each error.

The screenshot shows the 'Edit a Catalog' interface. On the left is a sidebar with four tabs: 'Details', 'Content', 'Errors', and 'Subscriptions'. The 'Errors' tab is selected. The main area displays a message: 'The catalog file contains errors. To fix the error, upload a new catalog file or click the item in the Error Description column, or the Line Number.' Below this is a link 'Upload new catalog file.' and a section titled 'Catalog Validation Errors'. This section contains a table with three columns: 'Description ↑', 'Field', and 'Line Number in Your Catalog File'. The table lists three errors, all related to duplicate 'supplierpartid' values.

Description ↑	Field	Line Number in Your Catalog File
The item on line 12 duplicates another item with key supplierid supplierpartid supplierpartauxiliaryid		12
The item on line 14 duplicates another item with key supplierid supplierpartid supplierpartauxiliaryid		14
The item on line 11 duplicates another item with key supplierid supplierpartid supplierpartauxiliaryid		11

- In this case, the Network is telling us that the **Supplier Part Number** is not unique on lines 11, 12 and 14.
- To correct any issues, go back to the original Excel Catalog file and make the corrections. Then update the Catalog file and upload the new version to replace the existing Catalog.

Uploading and Publishing New Catalogs

■ Customer Approval

- When your Catalog passes the Network upload validation, your Customer is then notified to audit, validate and approve your Catalog. The Network may show any of these statuses: **“Published”**, **“Validated by Customer”** or **“Pending Buyer Validation”**—*note that these are all valid statuses*.
- Each Customer may have specific validation rules—and these rules may be more strict than the standard Network rules. This means that your Catalog could pass the Network validation, but fail the Customer-specific rules and be returned to you.
- If your Customer finds anything in your Catalog file that requires your attention, you will be notified by e-Mail.
 - Corrections should be made to the original Excel file, then the corrected Catalog file needs to be uploaded to the Network.
 - Each Catalog must pass both the Network validation, and the Customer audit before it can be loaded into the Customer’s buying application and be available for their Users.

Replacing Existing Catalogs

Replacing Existing Catalogs

To replace an existing Catalog, the steps are almost the same as uploading a new Catalog for the Customer.

- Log into your Ariba Network account.
- Navigate to **Catalogs**.
- Update the Catalog—using “View/Edit”.
 - When *replacing* an existing Catalog, do **not** Create a new Catalog—it is important to keep the **same** Catalog Name. The file name **can** be different.

Catalogs

Manage catalogs for your customers using the catalog dashboard. Catalog files must be CIF, cXML, or Excel files (.cif, .xml, .xls or .zip). Some customers

	Customer Name ↑	Catalog Name	Version	File Name	Type	Size	Visibility	Created By
	None	Test PunchOut	1	2898517Punchout.cif	CIF3.0	553 B		Catalog Manager
	Buyer Name	Buyer Test CIF	1	99089.cif	CIF3.0	4 KB	Private	Catalog Manager
	Buyer Name	Buyer Test CIF	1	BuyerCat.cif	CIF3.0	2 KB	Private	Catalog Manager
	Buyer Name	Buyer Test CIF	1	Catalog.cif	CIF3.0	2 KB	Private	Catalog Manager

↳ View/Edit Test Delete Create and Create Punchout Only Refresh

Replacing Existing Catalogs

- Find the existing Catalog you wish to replace with a new version.
 - Click on the radio button to select the existing Catalog.

Catalogs

Manage catalogs for your customers using the catalog dashboard. Catalog files must be CIF, cXML, or Excel files (.cif, .xml, .xls or .zip). Some customers

	Customer Name ↑	Catalog Name	Version	File Name	Type	Size	Visibility	Created By
<input checked="" type="radio"/>	Buyer Name	Buyer Test CIF	1	BuyerCat.cif	CIF3.0	2 KB	Private	Catalog Manager

↳ [View/Edit](#) [Test](#) [Delete ▼](#) | [Create Standard](#) [Create Punchout Only](#) [Refresh](#)

- Click “View/Edit”.

Replacing Existing Catalogs

- You are now taken to the Edit a Catalog Screen.
- You see the same 3 steps as a New Catalog.
 1. **Details**—Most of the fields are pre-populated with the existing information, but you can add a new Description for the updated Catalog.

The screenshot shows the 'Edit a Catalog' interface. On the left, a sidebar contains three steps: '1 Details' (highlighted with a red box), '2 Content', and '3 Subscriptions'. The main content area displays the following information:

- Catalog Name:** Cif Catalog
- File Name:** BuyerCat.cif
- Created By:** Catalog Manager
- Date Created:** Tuesday 30 Jun 2015 7:53 AM GMT-07:00
- Version:** 1
- Size:** 2 KB
- Item Count:** 5
- Type:** CIF3.0
- Status:** Published

The **Description** field is highlighted with a red box and contains the text 'Updated Catalog with new pricing - January 2017'. Below this field, a character count indicates 'Characters left: 953' and a note states 'The maximum number of characters allowed is 1000, including spaces.' At the bottom, there is a section for 'Commodities' with a table header 'Description' and a row with 'No items'. Below the table are 'Delete' and 'Add' buttons. The 'Next' button is located at the top right and bottom right of the screen.

- Click “Next”.

Replacing Existing Catalogs

2. **Content**—The Network will display the current Catalog (if it is under 4Mb).

Previous Create New Version Upload Catalog File Download Catalog File Update Header Data Exit

- We don't want to "Create a New Version"—that button will take us back to the beginning as if we are uploading a brand new Catalog.
- We want to "Upload a Catalog File"—this will replace the existing Catalog File with our updated Catalog. Click the **Upload Catalog File** button.

Replacing Existing Catalogs

- Select your Catalog file, by clicking the **Choose File** button, then “Browse” and point to your file.
 - Your Excel file must not exceed 1 Mb, however you can use zip compression.
 - If your Excel file is too large, you will need to convert it to a CIF. See the Appendix—“How to convert an Excel file to CIF”.
- After you have selected your Catalog file, click “Validate and Publish”.

The screenshot shows the 'Edit a Catalog' interface. On the left, there is a sidebar with three tabs: '1 Details' (selected), '2 Content', and '3 Subscriptions'. The main area has a title 'Edit a Catalog' and two buttons: 'Previous' and 'Exit'. Below the title, there is a text instruction: 'Choose the catalog file for upload. Catalog files must be CIF, cXML, or Excel files (.cif, .xml, .xls or .zip). To download the Excel catalog template, click [More](#)'. Below this is a section titled 'UPLOAD YOUR CATALOG FILE' containing a file upload area with a 'Choose File' button (highlighted with a red box) and the text 'No file chosen'. At the bottom of the main area, there is a yellow warning box with the text: '! After you click Validate and Publish, do not use your Web browser until your catalog is finished uploading. Large catalogs can take several minutes to upload.' Below the warning box is a blue button labeled 'Validate and Publish' (highlighted with a red box).

- As your Catalog loads, you will be returned to the Catalog Home screen and the status will read “Validating”. Click the “Refresh” button at the bottom of the screen to see the status change. Be sure to wait for the validation to finish.

Replacing Existing Catalogs

- When your Catalog passes the Network upload validation, the Network may show any of these statuses: **“Published”**, **“Validated by Customer”** or **“Pending Buyer Validation”**—note that these are all valid statuses. The upload is complete.

Catalogs

Manage catalogs for your customers using the catalog dashboard. Catalog files must be CIF, cXML, or Excel files (.cif, .xml, .xls or .zip). Some customers might have defined specific cat

Creating a CIF from an Excel File

- Save it as a “.csv” file. To see the choices, click on the drop down menu.

Creating a CIF from an Excel File

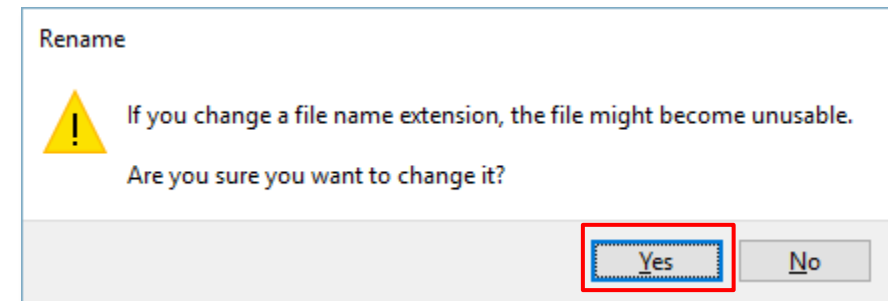

- You will get a system warning about saving it as a .csv—click “Yes” to continue.

- Rename your saved file, by changing the extension to “.cif”.

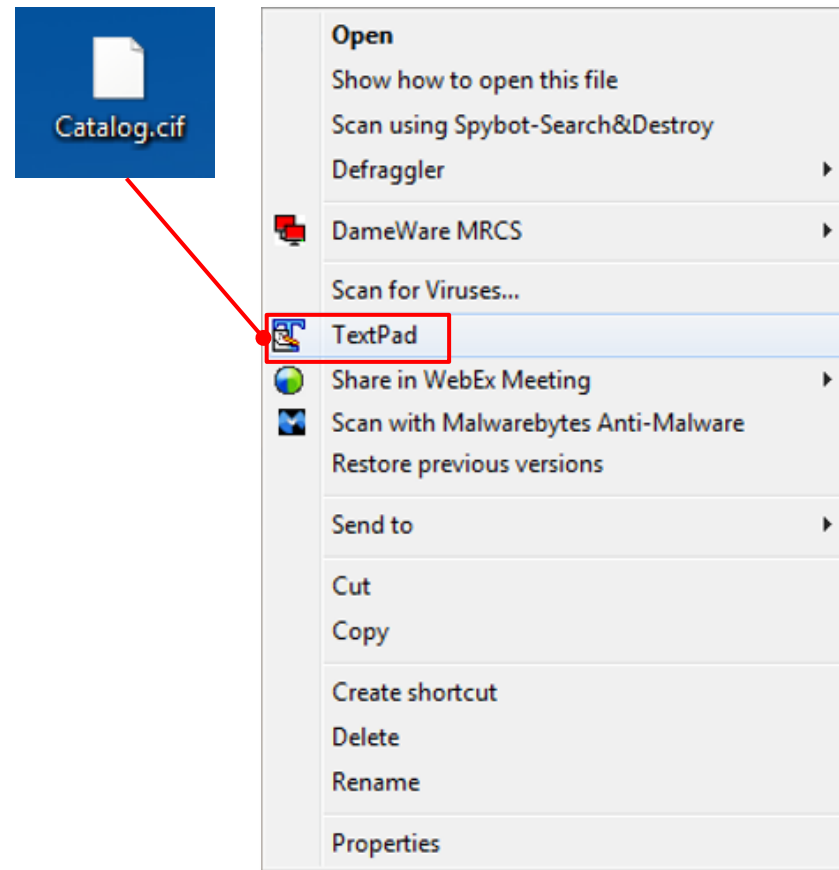

- The system will warn you about changing the extension. Click “Yes” to continue.

Creating a CIF from an Excel File

- Open your CIF Catalog file with Notepad, or your favorite text editor.

Creating a CIF from an Excel File

- Notice that the file has new, added commas in the Header, and after the DATA and ENDOFDATA markers.

The screenshot displays a Windows XP desktop environment. The primary application is a TextPad window titled "TextPad - C:\Users\ CATMAN\Desktop\Catalog.cif". The menu bar includes File, Edit, Search, View, Tools, Macros, Configure, Window, and Help. The toolbar features various icons for file operations and editing. The main text area shows the contents of "Catalog.cif":

```

A Document Selector sidebar on the left lists "Catalog.cif". At the bottom, there are three utility panes: "Explo..." (Explorer), "Docu..." (Documents), and "Clip L..." (Clipboard). Below these is a "Search Results" pane which is currently empty. The status bar at the very bottom indicates "For Help, press F1" and shows page navigation controls with values 10 and 52.

Creating a CIF from an Excel File

- Remove these extra commas after the Header values and the DATA and ENDOFDATA markers. Be sure to remove any commas in *front* of the data in the Header as well.

The screenshot shows a Windows XP desktop environment. A single application window titled "TextPad - C:\Users\CATMAN\Desktop\Catalog.cif" is open. The menu bar includes File, Edit, Search, View, Tools, Macros, Configure, Window, and Help. The toolbar contains various icons for file operations and editing. On the left side, there is a "Document Selector" pane showing the current document as "Catalog.cif". The main text area displays the contents of the file, which appears to be a CSV or similar structured data format. The first part of the file contains header information:

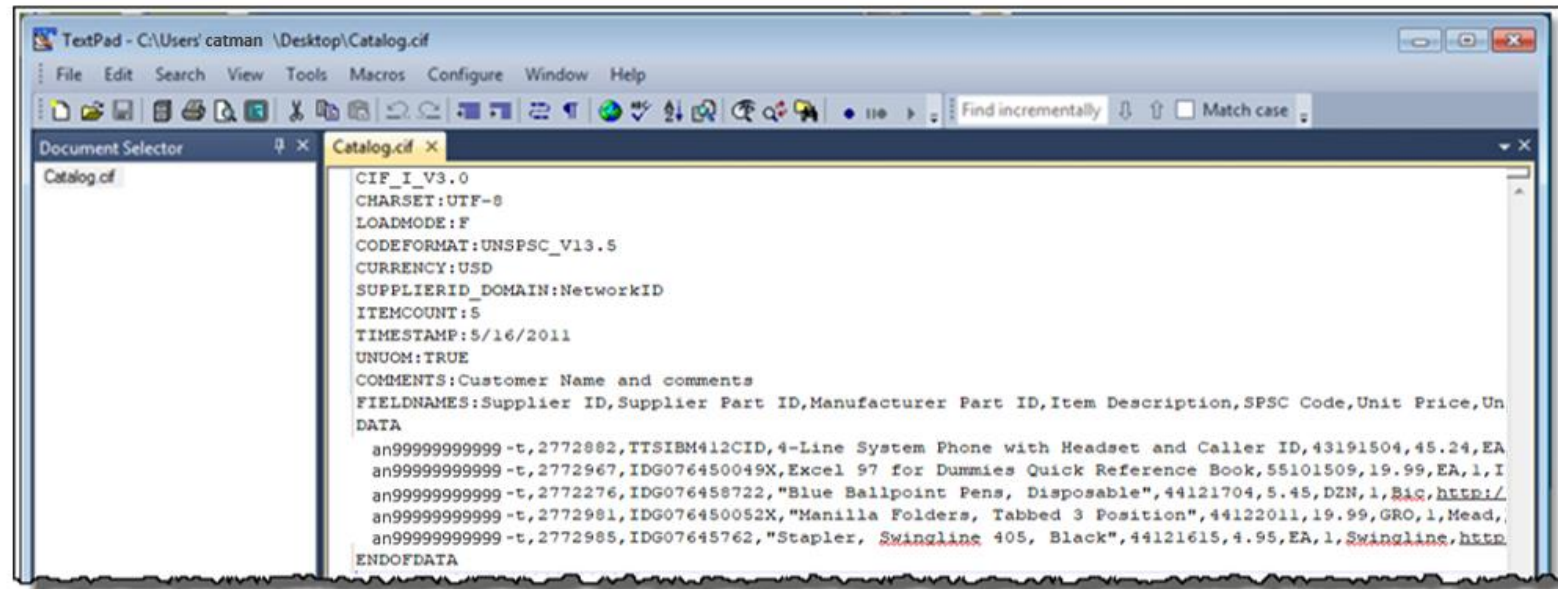

```
