

Feature Overview

Introducing: Temporary Standard Account support for suppliers

Feature Description

Existing SBN supplier admins can **claim their company email domains** and configure options for various registration types, such as procurement, sourcing etc.

They can also drive new buyer invites to register a "**Temporary Standard Account**" when a potential duplicate registration is detected based on the email domain.

A "**Temporary Standard Account**" is a standard account with certain limitations. For example, it is not searchable by other Trading Partners and has restrictions on access to discovery, catalog etc.

Temporary account can be **converted** to Standard Account with the **approval** from the parent account

Key Benefits

Trading Partner (Buy Side): Gains access to a clean directory, as temporary accounts are not shown in search results.

New Trading Partner (Sell Side): Can participate in networked collaborations without being blocked, with assurance that temporary accounts have restricted usage.

Trading Partner Domain Owner: Has full control over new registrations on behalf of their company, ensuring that temporary accounts have limited usage.

Audience:

Buyer and Supplier

Enablement Model: Automatically On

Applicable Solutions:

SAP Business Network Supplier Onboarding

- Login to the supplier account
- Click the user avatar and click settings
- Under settings click 'Manage Account Email Domains'
- On this screen, account admin can claim the available domains and configure governance for new account registrations
- To make changes, click **EDIT**. If a domain is available, select checkbox to claim it.
- Once a domain is claimed, configure appropriate settings per registration type:

Registration domain availability and available settings

- The display of the email domain is based on at least one verified user having that domain.
- For each domain available options are
 - Walk-up Registration: Block or Permit
 - **Procurement-based Registrations (TRR and QE):** Block, Permit, Permit Temporary
 - Sourcing and SLP Registrations: Permit, Permit Temporary (Blocking is not available due to the time-sensitive nature of these registrations.)

Here,

- **Block**: Fully restricts new registrations of that type.
- **Permit**: Allows the creation of a **Standard** or **Enterprise** account.
- Permit Temporary: Enforces a Temporary Standard Account when an invitation is sent

Temporary Account Limitations

- Not searchable: Profile visibility settings are preselected and locked making it not searchable by buyers.
- Single user only: The account is limited to one admin user. No additional roles can be added.
- Parent Child Linkage: Temporary accounts are automatically linked to the account that owns that domain
- Catalog Access: Access to catalog is restricted
- **Discovery:** Discovery module is restricted

Converting Temporary account to a standard account

- Login to the Temporary Account.
- In the Trading Partner Portal, click Convert to Standard Account.
- This starts the **approval process** with domain owner.
- Enter an optional comment to be sent to the approver via email.

Domain Owner approving the conversion of Temporary account

Business Network		 Login as an administrator of the domain owner account. Navigate to Settings → Approval Notifications. Locate the pending request and click Review and Approve. Verify details (requestor company name, sender details, email). Click Accept to complete the conversion.
