ADVANCED SHIPPING NOTIFICATION
INTRODUCTION

An **Advanced Shipping Notification (ASN)** is a document from a Supplier to a Buyer that provides details of an imminent shipment. It consists of a document header and items. It can also contain packing information. The header contains data that is valid for all items and packages.

ASN is also the path to obtaining the necessary shipping labels for your order.

Ariba Network provides multiple options to maintain ASN:

1. **Individual PO management.**
   With a low volume of POs, you may simply go to the PO and click the *Create shipping notice* button that will allow you to fill individual shipment notification per PO.

2. **Multiple PO's management.**
   In case of multiple lines of POs to be shipped, you should use the tab **Items to Ship** for a one-step action.

ADVANCED SHIPPING NOTIFICATION
PROCESS TYPES - GENERAL CONSIDERATIONS

Supplier Managed Freight Process

Supplier books carrier based on PO terms and conditions and submits ASN with the details to Honeywell.

This process is determined by the Incoterms from your Purchase Order.

The following Incoterms are applicable for Supplier managed freight:

CPT	DDP
CIP	CFR
DAP	CIF

Honeywell Managed Freight Process

Honeywell books the carrier using an approved freight partner. Supplier submits ASN to notify of shipment readiness.

This process is determined by the Incoterms from your Purchase Order.

The following Incoterms are applicable for Honeywell managed freight:

EXW	FOB
FCA	FAS

Note: Please contact the Buyer in case of the wrong Incoterm included on the PO, or else the incorrect ASN process will be selected.

ADVANCED SHIPPING NOTIFICATION
HONEYWELL MANAGED FREIGHT PROCESS - GENERAL

Honeywell Managed Freight will follow one of two sub-processes which is determined by the total weight of your shipment.

The information populated on the ASN will connect with Honeywell's transportation management system and shipping instructions will be provided according to current Honeywell Logistics agreements.

The following Incoterms are applicable for all Honeywell Managed Freight:

| EXW	FOB
FCA	FAS

Parcel Shipment Process

- Total shipment weight **less than 150lbs / 68kg**
- Pack Items information is required
- Honeywell will provide a Return ASN Ariba Network containing a courier shipping label

TMC Booking Process

- Total shipment weight **more than 150lbs / 68kg**
- Pack Items information is required
- Honeywell will process the original ASN and create freight booking available through email notification and Honeywell TMC portal.

ADVANCED SHIPPING NOTIFICATION
GENERAL PROCESS FLOW

The transportation booking process will be determined by two factors: **PO Incoterm + Total Shipment Weight**

Incoterm	Weight	Shipping Label
EXW, FOB, FCA or FAS	Less than 150lb or 68kg	**by Honeywell via Ariba ASN**, labels available at the end of the ASN creation
EXW, FOB, FCA or FAS	More than 150lb or 68kg	**by Honeywell via TMC Portal,** shipping instructions to be provided via e-mail by TMC a few days later
Any (except EXW, FOB, FCA or FAS)	Any	**Booked by Supplier**

INDVIDUAL PO ASN

Honeywell

ADVANCED SHIPPING NOTIFICATION
CREATE ASN – INDIVIDUAL PO

There are 3 possible ways to start creating an individual shipping notice.

From the **Workbench**:

1. Click on **Items to Ship** tile.
2. Identify the right items using **filters**.
3. Select and click **Create ship notice**.

    OR

4. From **Orders** > **Orders and Releases** tab:
5. Identify the right document using **search filters**.
6. Click **Actions** > **Ship Notice** or **Create Ship Notice** button.

    OR

7. You can also create ASN from the PO screen. Click Create Ship Notice.

Note:

- If **Create Ship Notice** button is not available for selection, please contact your PO buyer to modify Confirmation Control Key (CCK) in SAP.

ADVANCED SHIPPING NOTIFICATION
CREATE ASN – HEADER LEVEL INFORMATION

Fill out the requested information on the Shipping PO form.

1. By default, this is your company address in your Ariba Network account. If you need to change ship from information make sure address is matching in all fields. Step 1, 10, 15 & 16.

2. Do not modify the "Deliver To" address at the top. If delivery address is different, inform PO buyer to modify it in PO.

3. Complete fields in the Ship Notice Header. Full field name details are on Appendix.

4. Provide the Packing Slip ID. This must be a unique number.

5. Shipping Date must precede the Delivery Date.

6. Delivery Date must be later than the Shipping Date. In case of small parcel shipment, a 10-day tolerance applies.

7. Review the informational banner to determine the shipping process.

8. **If the shipment is managed by Honeywell, please check the box and leave the Carrier Name field blank.**

9. **If the shipment is managed by your company, please uncheck the box and provide the Carrier Name, tracking, BOL information.**

10. Ship from fields should be supplier information.

11. Ship to fields should be PO buyer information; PO buyer email can be found in PO.

12. Informational tooltip fields are indicated with ⓘ. Click on these icons to review additional field information.

Note: Phone Numbers on the contacts must have at least 10 Numeric characters, try to avoid using "()" or "+" Signs.

Note:
Fields from steps 10 to 16 are automatically populated with PO information, but they can be manually modified if needed.
For more Header level information fields go to Appendix.

ADVANCED SHIPPING NOTIFICATION
CREATE ASN – HEADER LEVEL INFORMATION - CONTINUED

Fill out the requested information on the Shipping PO form.

13. Export reason code is defaulted to "Permanent". Do not modify unless clear instruction has been received.

14. AES applies to US-originating exports over $2,500 value.

15. Shipping information is pre-populated from the Purchase Order data. Please update to reflect the actual Ship From location. All fields are required.

16. Ship From Country must follow a 2-digit ISO code format.

17. Delivery Terms default to "Transport Condition". This should not be changed. Applicable delivery terms are listed under Transport Terms.

18. Shipping Payment Method. For Supplier Managed freight process select the appropriate value. For Honeywell Managed freight always select "Collect".

19. Transport Terms incoterm is pre-populated from the PO. Do not modify this. This incoterm will drive the freight process selection.

Note:
Informational tooltip fields are indicated with a lowercase "ⓘ". Click on these icons to review additional field information.
For more Header level information fields go to Appendix.

Note:
Fields from steps 10 to 16 are automatically populated with PO information, but they can be manually modified if needed.

ADVANCED SHIPPING NOTIFICATION
CREATE ASN – ORDER ITEMS LINE LEVEL – MANDATORY FIELDS

Scroll down to view line-item information and complete fields as required.

1. **Ship qty.** Verify the quantity to ship

2. **Country of Origin** will be required for every line item.

3. **Weight and weight UOM.** Type the weight and Unit of Measure – Consider the Net Weight for this field.

4. Click on 'Add ship notice line' if you want to split the quantity to populate multiple batch ID per quantity.

5. To finish the form and move forward click on "Pack Items".

- **Quality Certificates** will be required if this field is visible. Add quality certificate in Attachment field, above Order items and Delivery information section.

- If **Serial Numbers and Dangerous Goods** declaration is needed, please go to instructions in Appendix.

- For more Order items information fields go to Appendix

- Batch Managed material will require that the following fields are populated: **Supplier Batch ID, Production Date, Expiry Date.**

1. Summary of the material you are going to ship, including PO numbers, Part No., Description and Quantity

2. Handling unit you will require for this shipment. In this section you can select pallet and boxes (if you are using both) or either boxes or pallet.

3. Inner handling unit: inner package or material.

4. Quantity that fits in one pallet or box.

5. Weight of one pallet or box, gross weight is for the total amount (packaging + material) and net weight is for the material only. Net weight should match Net weight added in previous screen.

6. For Unit/Weight UOM select either Kilograms or Pounds from the dropdown.

ADVANCED SHIPPING NOTIFICATION
PACK ITEMS. HOW TO FILL DEFINE INSTRUCTIONS SCREEN

Scenario 1. I only use boxes for my shipments.

1. Choose the box option (either CM or IN).

2. Modify standard box dimension. If the dimensions varies, you can adjust it on the next screen.

3. Enter the quantity of items that fit in **ONE** box. If the quantity varies, you can adjust it on next screen (the entered quantity must not exceed the box's capacity. If it does, please select that box as the 'Standard' and choose the higher capacity box here.

4. Add the gross weight (**ONE** box weight including material and package weight) and add net weight (**ONE** box weight including only material weight) and click next.

Note: Keep Net Weight consistent. If using multiple boxes, ensure their total matches the Net Weight entered for this line item on the first screen.
Example: Same PO with 2-line items, and one line-item split. My standard box fits 5 items of any of these materials.

PO Number	Line Item	Ship Notice Line	Quantity (pcs)
4420027310	1	1	6
4420027310	1	2	4
4420027310	2	—	3

ADVANCED SHIPPING NOTIFICATION
PACK ITEMS. HOW TO FILL CONFIRM PACKING SCREEN

Scenario 1. I only use boxes for my shipments.

Example: My standard box fits 5 items of any of these materials. Since I will ship 13 items, the system calculates that 4 boxes are needed to accommodate them.

5. Boxes required for this shipment. The system will determine the number of boxes based on item quantity and packaging rules.

6. Handling unit required for this shipment. Since 4 boxes are needed, there will be 4 handling units.

7. You can modify each box dimensions and weight, if necessary, by clicking in blue ruler.

8. Ariba does not mix different line items (and split items) in a single box **automatically**. You will see how many boxes are needed per line item (and split items) and how many items fit into each box.

9. Optional: If you notice that a box in one of the available handling units has space for additional items (**and you want to mix them**), you can click Move to… on the line item box you wish to relocate. Then, select the handling unit that has sufficient space for the selected item. Once done you will see the new quantity of boxes needed.

ADVANCED SHIPPING NOTIFICATION
CREATE ASN – HEADER LEVEL INFORMATION - CONTINUED

Fill out the requested information on the Shipping PO form.

13. Export reason code is defaulted to "Permanent". Do not modify unless clear instruction has been received.

14. AES applies to US-originating exports over $2,500 value.

15. Shipping information is pre-populated from the Purchase Order data. Please update to reflect the actual Ship From location. All fields are required.

16. Ship From Country must follow a 2-digit ISO code format.

17. Delivery Terms default to "Transport Condition". This should not be changed. Applicable delivery terms are listed under Transport Terms.

18. Shipping Payment Method. For Supplier Managed freight process select the appropriate value. For Honeywell Managed freight always select "Collect".

19. Transport Terms incoterm is pre-populated from the PO. Do not modify this. This incoterm will drive the freight process selection.

Note:
Informational tooltip fields are indicated with a lowercase "ⓘ". Click on these icons to review additional field information.

Note:
Fields from steps 10 to 16 are automatically populated with PO information, but they can be manually modified if needed.

ADVANCED SHIPPING NOTIFICATION
CREATE ASN – ORDER ITEMS LINE LEVEL – MULTIPLE PO

Information from the purchase orders is copied to the ship notice (part ID, qty, need by, price, etc.). Scroll down to view POs and line-item included in this ASN.

1. Check quantity to be shipped. The quantity will be pre-populated with the remaining balance of the PO line. Also, over-delivery may apply (the system will show what is possible).

2. If you click **Add Ship Notice Line** button, you can split the quantity to populate multiple batch ID per quantity.

3. Add **Country of origin** as it is a mandatory field. If **Batch ID** and **Expiry Date** is displayed, it is required.

4. Add **Net weight** for each line item.

- **Quality Certificates** will be required if this field is visible. Add quality certificate in Attachment field, above Order items and Delivery information section.

- If **Serial Numbers and Dangerous Goods** declaration is needed, please go to instructions in Appendix.

- For more Order items information fields go to Appendix.

Note:
- On the right side of each line item click the **Remove** button in case you need exclude the whole line from this ship notice.
- Items from multiple POs can be sent on the same shipping notice.

1. Summary of the material you are going to ship, including PO numbers, Part No., Description and Quantity

2. Handling unit you will require for this shipment. In this section you can select pallet and boxes (if you are using both) or either boxes or pallet.

3. Inner handling unit: inner package or material.

4. Quantity that fits in one pallet or box.

5. Weight of the one pallet or box, gross weight is for the total amount (packaging + material) and net weight is for the material only.

6. For unit Unit/Weight UOM select either Kilograms or Pounds from the dropdown.

▪ Note: Handling unit dimensions and Unit must be entered consistently in either Metric or Imperial formats; do not mix or the submittal will fail.
   PALLET/BOX_CM – for Kilogram
   PALLET/BOX_IN – for Pound

ADVANCED SHIPPING NOTIFICATION
PACK ITEMS. HOW TO FILL DEFINE INSTRUCTIONS SCREEN

Scenario 1. I only use boxes for my shipments.

1. Choose the box option (either CM or IN)

2. Modify standard box dimension. If the dimensions varies, you can adjust it on the next screen.

3. Enter the quantity of items that fit in **ONE** box. If the quantity varies, you can adjust it on next screen. The entered quantity must not exceed the box's capacity. If it does, please select that box as the 'Standard' and choose the higher capacity box here.

4. Add the gross weight (**ONE** box weight including material and package weight) and add net weight (**ONE** box weight including only material weight) and click next. **Note:** Keep Net Weight consistent. If using multiple boxes, ensure their total matches the Net Weight entered for this line item on the first screen.

Example: My shipment is for 3 different POs and line items. My standard box fits 6 items of any of these material.

PO Number	Line Item	Ship Notice Line	Quantity (pieces)
4420027305	1	1	3
4420027305	1	2	4

ADVANCED SHIPPING NOTIFICATION
PACK ITEMS. HOW TO FILL CONFIRM PACKING SCREEN

Scenario 1. I only use boxes for my shipments.

Example: My standard box fits 6 items of any of these materials. Since I will ship 27 items, the system calculates that 6 boxes are needed to accommodate them.

5. Boxes required for this shipment. The system will determine the number of boxes based on item quantity and packaging rules.

6. Handling unit required for this shipment. Since 6 boxes are needed, there will be 6 handling units.

7. You can modify each box dimensions and weight if necessary, by clicking in blue ruler.

8. You will see how many boxes are needed per line item (and split items) and how many items fit into each box.

9. Optional: If you notice that a box in one of the available handling units has space for additional items (**and you want to mix them**), you can click Move to… on the line item box you wish to relocate. Then, select the handling unit that has sufficient space for the selected item. Once done you will see the new quantity of boxes needed.

Goods Receipt Status: Completed

ADVANCED SHIPPING NOTIFICATION
REVIEW SUBMITTED ASN – CHECK SUBMITTAL STATUS

1. Once you have found your ASN to review, click on the **History** tab**.**

2. **Routing Status** is displayed in the History table at bottom of page. This status *Does Not Reflect* the status of the goods. This is only related to the status of document processing on the Network.

ADVANCED SHIPPING NOTIFICATION
DOWNLOAD ASN REPORT

ASN report consolidates detailed information from ship notices and their related purchase orders and goods receipts.

The report can include **schedule-line information** from purchase orders when the related ship notice was created using the **Items to Ship** tile or tab.

From the Homepage:

1. Click **Reports**.

2. Click **Create**.

3. To create a report template, enter your criteria and fulfill all mandatory fields. Set report type as **Ship Notice**.

4. Select the report template you've created and click **Run**.

5. Use **Refresh Status** button to update the status.

6. When the status changes to **Processed**, click **Download**.

ADVANCED SHIPPING NOTIFICATION
CANCEL SUBMITTED ASN

1. Once you have found your ASN, click on the **Cancel** link**.**

2. Click **Yes.**

3. The Ship Notice will now reflect the following statuses:

   1. Routing Status – Obsoleted

   2. Ship Notice Status – Canceled

ADVANCED SHIPPING NOTIFICATION
CREATE ASN – ORDER LINE LEVEL – SERIAL NUMBERS

Serial numbers are optional or mandatory depending on the type of purchased product.

They are mandatory if indicated in the purchase order. If mandatory, then the number of serial numbers must be equal to the shipped quantity.

1. Populate the serial number of the first item and Asset Tag, if needed.

2. Click on Add asset to add additional serial numbers. Please fill out only one serial number per asset field.
Note: If you have many serial numbers to provide, you can use the Serial number upload tool described on the next slides.
ADVANCED SHIPPING NOTIFICATION
CREATE ASN – ORDER LINE LEVEL – SERIAL NUMBERS UPLOAD TOOL

1. Click Manage Serial Numbers in the shipping notice screen.

2. Choose Download template from the dropdown list.

3. Extract and save the .zip file on your computer.

4. Open the file in Excel. If you do not see the columns like on the screen, see Appendix.

5. Enter the serial numbers in the Item Serial Number column. Save the changes. Do not edit any prefilled columns. All fields are mandatory, any missing information could cause upload failure.

6. To upload the updated file, choose Upload new file in the dropdown list.

7. Browse your computer and select the file.

8. Click Add attachment.

Note: When shipping partial quantity (for example 5 out of 10), you can delete the remaining unneeded 5 lines, and update the total item quantity (column G) to 5 on each line

ADVANCED SHIPPING NOTIFICATION
HONEYWELL MANAGED FREIGHT – DANGEROUS GOODS

Please use the following steps to make Dangerous Goods (DG) declarations for a Honeywell Managed Shipment. This is a mandatory requirement to book DG freight through Honeywell's TMC portal. Information entered via Ariba ASN will communicate to the TMC portal and influence the carrier determination.

Suppliers are responsible for complying with applicable global dangerous goods regulations and must correctly identify all dangerous goods shipment information in the Ariba Ship Notice.

1. Within the ASN line item, select the **Add Details** link.

2. Click the **Hazard Details** button to expand the drop-down menu.

3. Fill in required fields to make appropriate **Hazardous content descriptions**.

4. Click **OK** when complete.

Note:
- This is a mandatory requirement to book DG freight through Honeywell's TMC portal.
- Informational tooltip fields are indicated with ⓘ or "?". Click on these icons to review additional field information.
- For more Dangerous Goods information fields go to Appendix

ADVANCED SHIPPING NOTIFICATION
TOLERANCES

1. Honeywell may apply specific rules on each order, with a limitation in terms of quantity and date adjustment.

   - Suppliers can always notify about a quantity **under the requested quantity and split the quantity into multiple ship notices** announcing the different delivery dates.

   - Depending on each purchase order, it may be possible to notify **above the requested quantity** (over-delivery), based on negotiated tolerance with the Customer. Quantity split by delivery date is still possible.

2. In case your modifications are not allowed, you will see an error message.

3. Your buyer may set how many days early or late a ship-notice delivery date can be from the delivery date requested in an order or release. If during ship-notice validation this feature identifies a ship-notice delivery date that is outside the allowed tolerance, it prevents submission of the ship notice.
