

New Announcements Experience on SAP Business Network Trading Partner Portal

NEXTGEN-24411

Planned Release – August 2025

Introducing: New Announcements Experience on SAP Business Network Trading Partner Portal - [NEXTGEN-24411](#)

Innovation For: Buyers & Suppliers

Enablement Model: Automatically On

Feature Description: New Announcements Experience on SAP Business Network Trading Partner Portal.

Enabling Buyer's to perform the following operations in NextGen:

- Create new announcements.
- View a list of draft and published announcements.
- Update drafted/saved announcements.
- View status and details of all published announcements (including historical announcements migrated to NextGen).

Enabling Supplier's to perform the following operations in NextGen:

- View the count of new/unread announcements.
- View the list of all announcements, including those published in NextGen and historical ones migrated from the legacy system.
- View detailed content of any announcement.
- Access the NextGen announcement from an email announcement.

New Announcements Experience on SAP Business Network Trading Partner Portal - [NEXTGEN-24411](#)

Solution For: Comm Auto & Supply Chain

Solution Area: Announcements

Persona: Buyers and Suppliers

Key Benefits:

- Announcements built on SAP UI5 follows SAP's standardized Fiori design system which provides users with a unified, intuitive and consistent user experience across all SAP products.
- The new draft feature in announcements allows users to temporarily auto-save their changes as a draft for a short period of time without submitting the changes to be saved in the system, enabling them to pause and resume work later. This helps prevent loss of work due to timeouts, crashes, or accidental exits.
- The adoption of SAP UI5, OData, CAP, and CDS technologies aligns the Announcements feature with SAP's strategic technology direction, enabling faster enhancements and seamless integration with other SAP services.

Create New Announcements and Edit saved announcements - Buyer

- Create New Announcement: Blank input fields.
- Edit a saved announcement: Pre-populated fields with the saved details.

Draft Announcements – New capability

Draft Announcements – Highlighted with a blue vertical line on the left.

- Unsaved changes of an announcement are auto-saved for 30 days as a draft.
- Users can access the draft version and continue working on the draft version.
- Users can discard the draft version when not needed and continue with the previous saved version .

New Announcements Popup – Supplier (Only available for NextGen Suppliers)

- Suppliers shall have a modal pop up on login for new announcements.
- Supplier will be able to act on the portal after closing the pop up

The screenshot displays the SAP Business Network Supplier portal interface. At the top, a blue header bar contains the text "Welcome to SAP Business Network" and a search bar with the text "Orders and Releases", "man03_buyer_migrate_0611", "Exact match", and "Order number". Below the header, the "Workbench Overview" section features several cards: "Orders to invoice Standard" (0), "Orders Standard" (0), "Rejected invoices Standard" (0), "Remittances Standard" (0), "Pinned documents Standard" (0), "Open postings Standard" (0), "Matched Leads Standard" (0), and "Invited Leads Standard" (0). A modal popup titled "New Announcements (2)" is centered on the screen, showing two announcements: "Test announcement 2" and "New Announcement", both with a blue "MA" icon and a "View Details" link. The modal also includes a "View All" button and a "Close" button. Below the modal, the "Setup Actions" section contains buttons for "Configure order preferences", "Configure invoicing preferences", and "Configure payment preferences". The "Highlights" section shows a search bar with the text "man03_buyer_mig...". The bottom section includes "Activity log", "Profile Views" (0 views, Last 3 months), "Purchase orders USD" (0, Last 3 months), and "Application gateway". A "Feedback" button is located in the bottom right corner.
