

EVOLVE

SAP MODERNIZATION PROGRAM

Learn about MMC and the
SAP Business Network

Transacting on the SAP Business Network

Mohawk Medbuy (MMC) and the **Hospitals** below are streamlining purchasing/invoicing as part of the EVOLVE SAP Modernization Program, a large-scale modernization of procurement processes.

This initiative will replace the end-of-life legacy system with the latest innovative digital platform. It is scheduled go live is **Monday May 19, 2026**.

For suppliers, this means the traditional way of transacting with these hospitals is changing. The SAP Business Network will now be MMC's preferred way of transacting with suppliers.

Participating Hospitals

What is the SAP Business Network?

This is a cloud-based platform that enables MMC to conduct more streamlined and cost-effective purchasing and invoicing transactions, and to more efficiently:

- Receive purchase orders
 - Confirm orders
 - Receive electronic payment updates
 - Track orders
 - Create invoices
-

Other benefits include:

For Suppliers

- Manage supplier master data directly, including profile and contact details
- Benefit from structured onboarding, training and resources available from SAP
- Change management support from MMC

For Purchasers

- Purchase orders and invoicing delivered electronically
- Document exchange fully automated and happens in real time
- System-enforced compliance with procurement policies
- Real-time tracking and visibility of orders, invoices, payments and other updates

How does a Supplier get connected?

1. MMC emails an invitation to selected existing suppliers (and to any new suppliers).
2. The supplier decides which type of SAP account best suits its organization.
3. Within a week of MMC's invitation, SAP emails a trading relationship request to connect the supplier to MMC and to further configure the supplier account.
4. MMC notifies the supplier when it can start transacting with MMC on the SAP Business Network.
