

Static Catalog: BMEcat

- BMEcat, a format for conveying catalog data, is an open standard developed and maintained by Bundesverband Materialwirtschaft, Einkauf und Logistik e. V., the German association for materials management, purchasing, and logistics.
- BMEcat can be generated from a variety of XML generating applications.
- The BMEcat standard supports the following features:
 - Tiered pricing
 - Multiple images and thumbnails
 - Related documents such as product information sheets or user manuals
 - Related items, including similar items, mandatory items, and optional accessories and spare parts
 - Minimum order quantities and quantity intervals
 - Price flags that indicate whether duty, insurance, freight, or packing are included in the price of an item
 - Date-dependent pricing
 - Defined keywords for search
