

- After the Network completes validation, it changes the Catalog status from “Validating” to one of the following statuses:
 - **Activated, Published or Approved** - your Catalog is error-free
 - **Validated, Pending Buyer Validation or Others** – Your Catalog is being validated by the Network or your Customer
 - **Errors** – Catalog failed the file validation. Amend the errors found, and reupload your catalog.
 - **Rejected** – Your customer has rejected your catalog. If further information is required, please reach out to your customer directly.

Use the Catalog Status for a quick reference.
